LY iTECH

Engineering Graduate

Position overview:

As an Engineering Graduate Engineer at LY iTech, you will be involved in and responsible for a variety of engineering projects and tasks, working with cross-functional teams to provide technical support for the development, manufacture and improvement of the company's products. You will have the opportunity to apply your professional knowledge and skills in a practical way, while continuously enhancing your engineering capabilities and career development through participation in different projects and training activities.

Duties and tasks:

- Participate in the product development and design process, providing technical support and advice.
- Assist with engineering design and drafting to ensure compliance with specifications and standards requirements.
- Participate in the improvement and optimisation of product manufacturing processes to improve production efficiency and quality.
- Assist in resolving engineering issues and problems and provide technical solutions.
- Conduct engineering data analysis and report preparation to provide decision support and recommendations for improvement.
- Participate in quality control and quality management activities to ensure that products meet quality standards.
- Track and learn about the latest developments and trends in relevant industries and technical fields.
- Participate in teamwork and training activities to improve team effectiveness and professional competence.

Requirements:

- A recent graduate with a Bachelor's degree in Engineering or a related field.
- Strong interest and enthusiasm in the field of engineering with basic engineering knowledge and skills.
- Familiarity with engineering design software and tools, such as CAD, SolidWorks, etc.
- Good problem solving and analytical skills, able to identify and solve engineering problems independently.
- Good communication and co-ordination skills with the ability to work collaboratively with teams and stakeholders
- Basic knowledge and skills in data analysis and statistical methods.
- Good team player and adaptable with the ability to work in cross-departmental teams.
- Good communication skills in English and Chinese, with the ability to communicate effectively with international teams.
- Flexibility and the ability to adapt to a fast-paced and changing work environment.
